IBC Finland Operating Model

DEMAND:
Sustainable products and processes, bioalternatives, resource efficiency, waste prevention, environmental remediation

RAW MATERIALS:
- Biomass
- Renewables
- Recycled
- Agri and Forest
- Waste

PROCESSES:
- Cell factories
- Modelling
- Synthetic Biology
- Bioengineering
- Recovery

PRODUCTS:
- Platform chemicals
- Fuels and Energy
- Food and Feed
- Biocatalysts
- Pharma

Advance growth: Startup generation, scientific and technological excellence, infrastructure platform, industry renewal

SUPPLY:
Disruptive innovations, state-of-the-art technologies, science-based solutions, in-depth knowledge, international networks
